Natural History

Teachers-In-Charge : Mr Sydney Ellis, Mr. R. K. Dhaiya, Mr. Nitin Kumar

The first meeting turned out to be very interesting with a lot of new ideas floated by the boys especially concerning the environment and pollution.

The boys were told about keeping and caring for pets. They all showed a lot of interest in keeping fishes as pets. Seeing this the members decided to have

a fish pond made where different kinds of fishes were to be kept, in short, start a pisces culture.

Besides fish the boys took keen interest in keeping turtles and tortoise. They were also taught to catch chameleons and snakes.

The members were taken to the laboratory and shown various prepared slides and the use and handling of microscope.

Boys also picked and collected some animal specimens and learnt to preserve them. Skinning of snakes was done and the skins were preserved by the society. The members were also taken to the Mayo lake for the study of aquatic life.

History Society

- As a prelude to the Dalai Lama's visit on 8th July, 08 History teachers, Mr. N. P. Verma & Dr. M. M. Mathur gave a presentation on SINO-INDIAN relations and the background on Dalai Lama's History.
