30 Sep 11

RESIDENT MEDICAL OFFICER OFFICE

“OUTING BELLY” / “OUTING FEVER” POST OUTINGS

Dear Parents,

1. The School has shared its concern regarding large number of boys being sick with ‘Outing Bellies’ / ‘Outing Fever’ vide Principal earlier mail “ Hospitalization and absence from class after Outing” dt 25th Aug 2011 However, despite this, few parents / boys did not take adequate precautions. This resulted in a large number of hospital admission / boys not returning on time. This not only affects their performance in academic and sports but puts additional pressure on the Staff who then try and ensure that boys catch up with their assignments.

2. Given below in the sick report / hospital admissions prior and post the Outing on 10 and 11 Sep 2011.

Month		September 2011					
Date	7 Sep	8 Sep	9 Sep	10 Sep	11 Sep	12 Sep	13 Sep
Morning OPD	42	25	30	25	12	42	44
Evening OPD	14	18	15	08	07	24	28
Boys in Hospital	08	09	09	-	05 after dinner	11	21

3. May we therefore request you to kindly take necessary precautions / avoid taking your wards out for meals. If the child is well settled you may also consider reducing your frequent visits to the School.

With best wishes and warm regards,

Your’s sincerely,

Dr Akhilesh Bhardwaj
RMO
